SM Residential / Light Commercial Systems

All units feature **Stainless Steel water reservoirs and Solid State Circuitry**. Generators up to 11 kW operate on a 30-minute Time Cycle. Larger units have a 60-minute time cycle. The telephone type connectors make it simple to install the steam controls. All units are UL & CUL (Canada) Listed. Ideally suited for residential and "light" commercial (i.e. condominiums) applications.

Fixed Kilowatt Systems

* Dual Systems

- Dual systems utilize **two** steam generators - one master and one slave unit.
- Amperage listed for Dual Systems represent the electrical specifications of each generator.
- Auto-drain option requires the use two auto drains-one for each generator.

INSTAMIST

The InstaMist generators feature pre-heat function. This new feature maintains an average water temperature of 180°F in the stainless steel reservoir. When the steam generator is activated, the pre-heated water inside the steam generator quickly reaches the boiling point, allowing steam to flow out in under a minute.

InstaMist upgrade is per generator. For Dual System steamers, two InstaMist upgrades required.

(Saunafin Note: In our opinion, this feature has no real value. Even without the pre-heated tank water, most steamers will generate steam within 2-3 minutes, so there is little need to waste the energy or expense to pre-heat the water.

(InstaMist steamers cannot be used with auto drain feature.)

\$200

CONTROLS PRICED BELOW

Matching steamhead and escutcheon come with the control. All steamheads equipped with aroma therapy well. Controls come standard with a 25' control cable.

		List Price
<u>TC-135</u>	Timer & Programmable Digital Temperature Control (mounted inside steamroom) Customize the temperature of your steambath to suit your personal preferences. Easy-to-understand temperature icons with one-touch control. Digital display shows steamroom temperature. Time duration is pre-set to 30 minutes (60 minute for 11kw & larger).	
TC-135	Polished Chrome	\$450
	Other Finishes	\$515
Other finishes available: Polished Brass, Brushed Nickel, Polished Nickel, White		

<u>TC-150</u>	NEW CONTEMPORARY LOOK Features stylish steamhead with decorative trim and built-in diffuser Same functions as TC-135 above, with sleek new look.	
TC-150	Polished Chrome	\$520
	Other Finishes	\$575
Other finishes available: Polished Brass, Brushed Nickel, Oil Rubbed Bronze		
<u>TC-125</u>	NEW CONTEMPORARY LOOK Features stylish steamhead with decorative trim and built-in diffuser (Basic control – No temperature control) Same functions as TC-110 above, with sleek new look. For use alone or with TC-150	
TC-125	Polished Chrome	\$195
	Other Finishes	\$250
Other finishes available: Polished Brass, Brushed Nickel, Oil Rubbed Bronze		

DSC-425 & DSP-425 Designer Digital Programmable Time & Temperature Controls also available – Call for Pricing

Auto-Drain Option

This option automatically purges the generator after each steam cycle. *New water will enter at the beginning of each steambath.* The auto-drain is recommended for hard water areas or where steamer is used in a light commercial application.

Other Finishes

\$450
\$510

Other finishes available: Polished Brass, Brushed Nickel

Steam generator sizing is based on a number of criteria; including, cubic area, construction materials; etc.
Example: For the following, add to your calculated cubic area: Tile on cement board= +25%, granite, marble= +100%, Exterior wall= +10%, Steam pipe run over 10'= +1 cu. ft./ ft. I.E. Room- 4' x 5' x 7', tile over cement board, one outside wall = 140 cubic ft. +25% (35) =10% (14) = 189 cu. ft. (Steamer: SM-7). To determine steamer size requirement, consult the "SIZING THE STEAMROOM" information sheet or call.
